Projects

Meet App | Feb 2022

. Using React, built a serverless, progressive web application through test-driven development utilizing
AWS API to fetch upcoming events in Google Calendar.

myFlix, Server-Side | Dec 2021

. Create a REST Architecture API using Express.js Framework in Node and MongoDB for a movie application.
. Use Mongoose to modele business logic.
. Implemented Authentication, Authorization, Validation Code and Security Regulations.

myFlix, Client-Side | Jan 2021

. Using React to complete the Tech Stack MERN, created a single-page application where users can create a profile, see movies information and save them to a list of favorites.
. Use Bootstrap as UI library for styling and responsiveness.
